Bungo-Ono City promotes geopark activities
 Geoparks are areas where people can observe the geophysical activities of the earth while they contemplate their existence in the ecosystem through their natural and cultural heritage. Geoparks throughout the world are made possible with the support of UNESCO.

Bungo-Ono City was acknowledged as a Japanese Geopark in September 2013

GEOSITE MAP

Bungo-Ono City Geosite Map —Stories of the Earth and its People

Traces of a large eruption of Mt. Aso 90,000 years ago remain in this magnificently beautiful region. This area has a wealth of nature along with a special history and culture that have been passed down through the generations. Geosites are places where you can learn the stories of the earth and its people. Visit Bungo-Ono Geosites and let curiosity be your guide to the unique stories of the earth's history.
